## WATCHMAKER'S WORKBENCH

**FINework** watchmaker's work benches stand out for their great customisation options, and the quality of their finish. From a standard model, we can create a variety of custom workbenches with variable dimensions, and a multitude of details and specialities.

With assembly, casing, hand fitting to name but a few operations, watchmaking is a vast and varied profession. Our flawless knowledge of the field puts us well ahead of the game. Our products are diversified to meet the needs of your profession, not to mention the aesthetic requirements due to its prestige.

Do you have your own ideas for your workbench? Do you have a specific need, wish or a particular project? We can also develop custom workbenches for you, on a drawing or prototype basis if necessary, meeting your expectations in all points. Our guarantee? A cutting-edge, modern, ergonomic and reliable watchmaker's workbench.

## 4-FEET VERSION

The 4-feet version of Finework watchmaker's workbenches stands out for its traditional design. Boasting a genuine wood finish which will win over even the most demanding, and with a single-coloured laminate or imitation wood finish, this workbench provides a perfect blend between aesthetics, functionality and ergonomics.

Based on a common core design, this version offers countless possibilities for customisation: electric stand, mobile armrests, custom storage compartments, choice of materials, and also integration of any utilities you need to do your job.

In addition to the customisation options, we offer a wide range of accessories that you can integrate on Finework watchmaker's workbenches. Need particular accessories or equipment? No worries, our workbenches can be configured to integrate this equipment.

4-feet watchmaker's workbench with electric height adjustment and position memory control, simplified adjustable armrests, LED light with intensity control, double vacuum and compressed air swan's neck, 2 drawer blocks and central tambour cabinet.

## 4- FEET ELECTRICALLY ADJUSTABLE WORKBENCH

4-foot watchmaker's workbench with manual height adjustment, fixed embedded armrests, LED light with intensity control, single vacuum swan's neck, 2 drawer blocks and central open cabinet.

## 4- FEET MANUALLY ADJUSTABLE WORKBENCH

## STANDARD COLOURS

4-foot Finework watchmaker's workbenches can be configured in a selection of standard colours. On request, and depending on the number of workbenches required, we can also produce your workbenches in a range of non-standard materials.

## CUSTOM

Do you have a project and want a workbench that reflects your brand identity? Do you want to stand out from your competitors? Our custom department will be delighted to work with you to develop the workbench you have always dreamt of.

Our experience going back more than 40 years in developing workstations for watchmakers and jewellers enables us to offer 100 % custom solutions. Our rigour, professionalism, flexibility and capacity for innovation have already won over the biggest names in watchmaking.

### **Comprehensive study of your specifications**

Our team of engineers and technicians will study your project down to the finest details. Feasibility, materials study, ergonomics and design – all aspects of your project will be reviewed, to propose a solution fully meeting your desires and needs.

### **3D plan and visuals**

For planning purposes, we draw up a complete and detailed presentation dossier for you of all the technical aspects of the workbench. Our close-up drawings and the most realistic 3D visuals will give you an idea of your future station.

### **Prototype**

Replacing your workstations represents a substantial investment, and it is essential that users can test their future work tool before launching production of the run as a whole. To this end, we can produce a prototype of your workstation. This will enable you to check that nothing has been left out, confirm every detail, and appreciate the high-precision work done by Allemand Frères SA.

### **Manufacturing, installation and training**

Once the project has been validated, production of your new workstations can begin. Finework workstations are made entirely in Switzerland, with the greatest care. Your workstations are assembled in our own workshops, and once the run is complete, it is delivered and installed in your workshops. We also offer technical and ergonomic training for users.

Custom workbench with full side and rear panelling, electric height adjustment, adjustable armrests, keyboard extension, modular drawer unit, cubic utilities rail, technical access door, LED light, double swan's neck and round cable run.

## CUSTOM

## JEWELLERS WORKBENCHES

**Finework jeweller's workbenches can adapt perfectly to your workshops. Their compact rigid steel structure guarantees excellent stability and unmatched robustness of your workbench.**

Based on a common core design, our workbenches offer countless possibilities for customisation: Electric stand, custom storage compartments, choice of materials and colours, as well as integration of any utilities you need to do your job.

In addition to the customisation options, we offer a wide range of accessories that you can integrate on Finework jeweller's workbenches. Need particular accessories or equipment? No worries, our workbenches can be configured to integrate this equipment.

Fixed-height jeweller's workbench with base-mounted drawer cabinet, LED lamp with adjustable light temperature, stainless steel plate with peg, extendable soldering tab, collection drawer, collection layer, round cable run and footrest.

## JEWELLER'S WORKBENCH

- » Capacity per drawer: 75 kg or 200 kg
- » Castors and push bar in option

## COMPARTMENTS

There's nothing more annoying than spending your day looking for the tools you need to work. With our compartments, your drawers will always be well organised. No more equipment loose within your drawers and getting damaged by its movements.

Our drawers can be subdivided into small customised compartments in order to perfectly adapt to your tools and our cups, plastic trays, boxes and blisters, enabling you to store and label a vast variety of your components.

### Drawer separators

- » Plain partitions
- » Slit partitions
- » Separating plates

### Cups

- » Cups
- » Cup separators

### Plastic trays

- » Plastic trays
- » Lidded boxes
